

Wired Handheld Microphone

TS-331

Feature:

- * Strong zinc alloy structure, flexible steel nets with non-deformation and shatter-resistance advantages.
- * Using special plating or baking paint technology to process, strong resistance to alcohol corrosion.
- * Connect strong anti-broken Microphone cable and durable mute switch.
- * Applying the patent type head and tube assembly technology, avoid glue water.

Sound Quality Features:

- * The sound is pure and powerful.
- * Good high frequency transient response, can easily cope with the problems that singing enthusiasts' inactive to high frequency areas.
- * High frequency has magnetic feeling.
- * Suitable for professional performs, KTV singing, and high-end speech circumstance.

Specifications:

Model	TS-331
Transduction Theory	Moving Coil
Acoustics Theory	PG(Pressure Gradient) Receiver
Adaptization Type	cardioid type
Frequency Response	50Hz-17kHz
Normal Impedance	600Ω
Sensitivity	0°-50dB±3dB (0 dB =1v/pa at 1kHz)
Connection Port	XLR
Weight	0.204kg
Dimension	φ52.2x172.2mm
