

HT-840B

Desktop

The HT-840B is high quality Four channel microphone system set designed for use in Meeting rooms, Auditoriums, lecture halls and multi purpose paging applications. It uses the locked channel and frequency which intelligently eliminated interference signals. Its built-in feedback eliminating technology effectively decreases feedback and noise. With the unique HTDZ technology, it adopts the tone lock system to ensure the system has a strong anti jamming function.

Specifications

Product composition	Desktop wireless microphone x 4, Receiver x 1
Frequency Range	470-960 MHz
Channel selectable	Locked
Tunable Frequencies	-
Frequency Stability	20ppm
THD	<1% @ 1kHz
Microphone	Dynamic with Cardioid pattern
Battery	2 AA size alkaline battery, 1.5V
Battery life	Up to 10 hours
