

HT-8700RT

TRANSCIVER UNIT

Dedicated to HT-8700 IR wireless conference system, the HTDZ HT-8700RT is IR based transceiver unit. It is wide angle having transceiving range of approximately 150 degrees and signal range is more than 35 dBm. It adopts mounting hook which is very easy to install.

Specifications

Carrier frequency band	4MHz-8MHz
Rated current	380mA
Gain	>35dBm
Terminal type	TNC
Power supply	DC24V
Receiving sensitivity	-100dBm
Input/output Impedance	50Ω
N.W	1.71kg
